## PreStained High Range 3 Tri-Coloured Protein Marker: 10-315kDa

Part E

### Specifications

Appearance (Form)	Liquid
Appearance (Colour)	Dark Blue
Appearance (Clarity)	Clear
Electrophoresis test	Ladder shows 12 prestained protein bands during SDS PAG electrophoresis

### Other Information

Description

BioLit Prestained High Range 3 Tri-Coloured Protein Marker is a Ready-To-Use solution of carefully selected 12 stained proteins within a wide range of molecular mass (10-315 kDa). The marker has 12 bands at 10,17, 26, 34, 43, 52, 72, 95, 130, 180, 250 & 315 kDa each covalently bonded with a chromophore. All the bands are bonded to a blue chromophore except for 315 & 72kDa (orange chromophore) and 52 & 10 kDa (green chromophore) The three colour identification in ladder helps in easy orientation of the molecular sizes of the protein bands. The markers have been carefully prepared under sterile conditions and stored in appropriate additives to ensure long term stability. SDS PAGE analysis & Western Blotting  
Allows monitoring protein migration during electrophoresis

Application

### General Information

Storage	-20 °C (Blue/Dry Ice)
Shelf Life	24 Months
IMDG Identification	Not Regulated for Transport (Non-Haz)
HSN Code	
0.25 ml	38229090 (GST 12%)
