DNA Decontam Surface Decontamination Spray

Part E

Specifications

Appearance (Form)	Liquid
Appearance (Colour)	Colourless
Appearance (Clarity)	Clear
Assay	No DNA contamination detected

Other Information

Description

DNA Decontam is a potent, ready-to-use solution for rapid DNA decontamination of surfaces in laboratories. This reagent is characterized by its high efficiency. The decontamination spray completely destroys DNA within 60 seconds of surface treatment. The solution contains a unique combination of DNA destroying and surface active agents. DNA Decontam may be applied to steel, glass, ceramic, plastic, rubber, or precious metals including laboratory equipment and pipettors. It should not be applied on light and non-ferrous metals (e.g. aluminium, copper, lead, nickel, tin, titanium, zinc etc.). For other sensitive surfaces, test in a small area before applying.

The solution contains a non-alkaline and non-carcinogenic agent. The use of DNA Decontam both before and after PCR analysis is fast, easy and ideal to maintain a clean work area and thereby saves time and expenses.

Application

General Information

Storage	25 to 40°C (Room Temperature)
Shelf Life	24 Months
IMDG Identification	Not Regulated for Transport (Non-Haz)
HSN Code	
250 ml	38220090 (GST 12%)

Available Packages
