Appearance (Form) Liquid Brown Appearance (Colour) Appearance (Clarity) Clear Activity Tested in ELISA

Other Information

Description

Application

Antiserum is produced in Goat using highly purified human IgG as the immunogen. Whole antiserum is fractionated and then further purified by affinity chromatography to provide the IgG fraction of antiserum. This fraction is essentially free of other Goat serum proteins. Goat anti-human IgG is then conjugated to peroxidase by protein cross-linking

ImmunoFluroscence (IF) ImmunoCytoChemistry (ICC) ImmunoHistoChemistry (IHC)

ELISA

Western Blotting In Situ Hybridization

General Information

Storage -20 °C (Blue/Dry Ice) Shelf Life 24 Months **IMDG** Identification Not Regulated for Transport (Non-Haz) **HSN Code**

1 ml 38229090 (GST 12%)

Available Packages

1 ml
